

Tun Wai Linn

Software Developer

Profile

I'm an enthusiastic web developer dedicated to creating intuitive and visually captivating websites. Quick to pick up new skills and with a keen eye for solving challenges, I continuously seek ways to grow in software development. I work well within teams and communicate clearly. I'm eager to contribute to a vibrant team, collaborating on exciting projects to deliver exceptional digital experiences.

Education

B.E(Hons.) in Computer Science and Engineering

Myanmar Institute of Information Technology

Dec 2019 — Present

Work Experience

Customer Acquisition Specialist (Remote)

Phluid World Wide

Sep 2024 — Present

- Strategize and schedule promotional posts to drive user engagement and acquisition.
- Provide excellent user experience by efficiently distributing redeem codes with accuracy in a fast-paced environment.
- Collaborate closely with a team to implement and optimize acquisition strategies for maximum reach and effectiveness.

Projects

MLDLE

- Designed and launched a web game inspired by Mobile Legends, played and recommended by thousands of users.
- Built using Next.js and Radix UI for responsive design, fast performance, and accessibility.
- Collected data using Python web scraping to gather game information from Mobile Legends.
- Automated daily data updates and game adjustments via cron jobs, ensuring real-time accuracy and content freshness.

Phone Case Store

- Developed a full-stack eCommerce platform allowing users to customize phone cases using Next.js.
- Implemented secure authentication methods using OAuth and JWT for user account management.
- Utilized PostgreSQL to manage user data and orders.
- Integrated Stripe API for secure payment processing.

Real Estate Marketplace

- Developed a Zillow-inspired real estate marketplace with Laravel and Vue.js.
- Designed a dynamic, responsive UI using Vue.js and Tailwind CSS to ensure a seamless user experience.
- Integrated secure user authentication with role-based access controls for agents and buyers.
- Built advanced search and filtering functionality, allowing users to search properties by area, price range, and additional criteria.
